Clay Group: July 2018- July 2019(**Project Manager)**
Soft Info System Pvt Ltd: Aug 2016- July 2017**(Delivery Manager)**
Outshine Solutions Pvt Ltd: Nov 2014- April 2016**(Business Analyst)**
Genisys Software (Oracle): Nov 2010-Jan 2012(**Consultant)**
Newgen Software Technologies: May 2007-April 2009**(Tech Support Engineer)**

Siyana Corporation : Creating documentation like Flow Chart using Microsoft Visio tool, draw.io, Creating other document like FRD, SRS, BRD, WireFrame using Balsamiq tool etc. Apart from that creating sprint based project plan. Taking daily scrum calls etc . Preparing Project Plan for the new project etc

JAvaRND- I was responsible for replying to client query via Microsoft teams, Slack, and other communication channels. Onboard the freelancer who can help us in completing the daily task assigned by the client, explaining the developer the task assigned by client through Jira and helping developer in rectifying any problem which is occurring during daily standup call.

Previous Organisation : Clay Group – New Delhi, Okhla phase1: (Project Manager)-I was the first point of Interaction between the company and the client where my work was to interact with the client in order to understand their requirement, prepare FRD, SRS, then wireframe of the project using Balsamiq or Axure tool. Preparing Project plan, uploading task of the developers on PMS(Project Management Software) and then checking daily completion of task on GitHub repository as well on PMS(Project Management Software).Preparing UAT(User Acceptance Test) so that final signoff of the project can be taken.. Checking daily, weekly and Sprint wise communication via Upwork, Base camp and Emails. Taking care of the delivery part which involves proper QA of the Software , finding bugs, sending to the developers again in case of resolution of bugs then and finally delivery of the project along with Signoff.

Soft Info System Pvt Ltd: Worked as delivery manager for the organisation where my basic work was to give demo of the product "WIZAPP" to the end clients. WIZAPP was basically an ERP(Enterprise Resource Planning) software which consist of all the modules including Inventory management, Purchase Order, Purchase Invoice, Sales, Purchase, Dashboard and Reporting. It was developed on technologies C#.net using MVC architecture along with SQL Server database. Giving demo, preparing Scope of work for the client along with TechnoCommercial part involved and then the delivery part. I was also taking care of the TMS(Ticket Management Software) which involves replying and solving various client query through our TMS software.
